SKILLS

- ❖ Programming Languages : Python , Java , Javascript
- ❖ Frontend : HTML ,CSS , React
- ❖ Backend : NodeJS , Express
- ❖ Databases : MySql , MongoDB
- ❖ AI / Machine Learning:
 - NumPy, Pandas, Data Visualization (Matplotlib, Seaborn)
 - Supervised Learning: Linear Regression, Logistic Regression, Naïve Bayes, KNN, Decision Trees, SVM, Random Forest, Gradient Boosting
 - Unsupervised Learning: K-Means, Hierarchical Clustering, DBSCAN Clustering.
- ❖ Tools : Git & GitHub

EDUCATION

- ❖ IT Engineering | Datta Meghe College Of Engineering , Airoli Navi Mumbai
SCGPA : 8.88 |Till Semester 5| Year- Winter 2025
- ❖ XII (CBSE) | Amrita Vidyalayam , Navi Mumbai 82.4%| 2023
- ❖ X (CBSE) | Amrita Vidyalayam , Navi Mumbai 93.8%| 2021

ACADEMIC PROJECTS

❖ Wanderlust – Full Stack Web Application (Airbnb-Inspired)

Developed a full-stack property listing platform inspired by Airbnb that allows users to explore, create, and review property listings worldwide. Implemented secure authentication with password hashing, owner-based access control, and RESTful APIs using Node.js and Express.js. Integrated Mapbox for interactive location maps and Cloudinary for scalable image storage. Deployed the application on Render with MongoDB Atlas as the cloud database.

Tech Stack: HTML, CSS, JavaScript, EJS, Bootstrap, Node.js, Express.js, MongoDB Atlas, Mongoose, Mapbox API, Cloudinary

❖ AshaJyoti – Offline-First Healthcare Support System for Rural Areas (Smart India Hackathon Project)

Developed a digital healthcare platform for ASHA workers in low-internet rural regions, enabling **offline patient data collection, multilingual support, AI-assisted triage, teleconsultation with doctors, and automatic EHR synchronization** when connectivity is available.

AI Symptom Checker (My Contribution):

Built an AI-based symptom checker that interprets natural language descriptions of patient symptoms and classifies cases into **Red, Orange, and Yellow triage zones**, providing disease insights, precautionary advice, and emergency guidance. The system helps patients in rural areas identify the severity of diseases and decide whether to seek medical consultation at a **PHC or Civil Hospital**. The model is designed to work fully in **Marathi (regional language of Maharashtra)** to improve accessibility for local communities.

Tech Stack: Python, FastAPI, Uvicorn, NLP, Retrieval-Augmented Generation (RAG), SentenceTransformers (paraphrase-multilingual-MiniLM-L12-v2), Qdrant Vector Database, Google Gemini 2.5 Flash, NumPy.

❖ CreditWise Loan System

Built an end-to-end supervised ML pipeline using KNN, Logistic Regression and Naive Bayes to predict loan approval.

Implemented Binary classification along with EDA, feature engineering & model evaluation (Precision, Recall, F1).

ACHIVEMENTS

- ❖ Smart India Hackathon 2025 Winner (*Problem Statement Id – SIH25219*)
- ❖ Finalist at National Entrepreneurship Challenge (E-Cell IIT *Bombay*) (*Year – 2025-26*)

POSITION OF RESPONSIBILITY

- ❖ Lead Creative Designer | IT Placement Cell | Datta Meghe College Of Engineering
(*Year- 2024-25*)
- ❖ PR Head | E-Cell | Datta Meghe College Of Engineering. (*Year – 2024-25*)
